Linux/UNIX Systems I  
Unix Systems (CTUNX)

This program prepares students for jobs installing, configuring, and managing various UNIX and Linux operating systems. They will learn about UNIX/Linux file and directory organization, basic and advanced commands, shell scripting, networking, UNIX/Linux system administration and more. These skills can be applied to the related jobs of computer operator, system administrator, data recovery planner, and computer security coordinator.

Program Admission Requirements:

~~Students must complete CIS 110 or CIS 120 with a grade of "C" or better or have equivalent knowledge.~~

*Completion of CIS, EPS or CSS course above CIS 100 or Permission of Instructor.*

*This program introduces students to the Linux and UNIX operating systems and prepares them to safely run their own home servers.*

COMPUTER SYSTEMS PROGRAMS

This is a revision of the current Linux and UNIX certificates which are being changed because of changes in the technology and to streamline the program. Currently we have eight courses, this reduces it to seven. (INP 285 will go away or be cross-listed with CIS 206.) There is about 30-35% new content in these classes, although more than that will be updated. At Liz's suggestion I am including the top two pages for the revised courses. Pages 3 & 4 will be finished by the end of June.

Here is what we are thinking of:

A series of courses to prepare the student for an entry level UNIX/Linux system position. There should be an emphasis on security through out the program (i.e. system, network and application).

#### First Cert – Linux/UNIX Systems I

CIS 121 Linux/UNIX I - Fundamentals

CIS 221 Linux/UNIX Programming and Scripting I

CIS 206 Linux/UNIX II – Basic System Administration, Networking and Security

CIS 208 Linux/UNIX III – Intermediate System Administration, Networking and Security

#### Second Cert – Linux/UNIX Systems II

CIS 210 Linux/UNIX IV – Advanced System Administration, Networking and Security

CIS 222 Linux/UNIX Programming and Scripting II

CIS 212 Linux/UNIX V – Advanced Topics

#### The Courses:

CIS 121 Linux/UNIX I – Fundamentals

Stand alone desktop focus. An introduction into the Linux/Unix world as a desktop environment. Setting the machine up for both GUI and

command line. Some desktop management (KDE or GNOME), setup office applications, utilities and programming/development environment.

1. Basic Intro
2. Basic Install
3. File/directory structure
4. Basic commands
  - a. mail, login, telnet/ssh, passwd, who, date, exit, logout, startx, write, talk, mesg, cal, cat, cd, echo, find, locate, lp/lpr, ls, pwd, mount, umount, vi, man, cd, mkdir, mv, pwd, rmdir, set, variables, PS1, PATH, which, cp, file, more, less, touch, rm, \*, ?, [], noclobber, ignoreeof, pipes, >, <, >>, comm, cut, grep, zip, unzip, head, tail, sort, tar, tee, tr, paste, whoami, uniq, wc, spell, chmod, chgrp, chown, umask, su, groups, du, df, fsck, ln, alias, bg, export, fg, kill, ps, top, unalias, sleep
5. Relative absolute path
6. Home directory
7. Basic GUI
8. Very simple script

### CIS 221 Linux/UNIX Programming and Scripting I

Main focused on shell programming and scripting, the type of tasks that system administrators would need. Additionally, introduction to eclipse or other development environments.

1. Limited Regular Expressions: . \* .\* [] [] ^ \$ \ ( \) \{ \}
2. How the shell works and env
3. cut, paste, sed -n pdsg, sort, grep, uniq, variables, ‘, “, ` , \, expr, \$(), \$#, \$\*, shift, if then else fi, exit, case, && | |, \$\$
4. loops – for, while, until,
5. read
6. passing args
7. variables, running in current shell
8. readonly, \$0, \${ }, \${ :- }, etc
9. wait
10. trap

11. functions
12. brief awk intro

### CIS 206 Linux/UNIX II – Basic System Administration, Networking and Security

Introduction to using Linux/Unix in the enterprise environment. Introduction to System Administration concepts. Introduction to the concept of multi-user network systems, authentication, authorization, resource sharing, volume/directory management, basic networking and host based firewalls.

1. User Management
2. File Concepts
3. Minimal Server Installation
4. zip
5. tar
6. NFS
7. NIS
8. Automount
9. ssh
10. Partitioning
11. Logical Volume Manager
12. Basic Networking
  - a. Intro to IP
  - b. Intro to Subnet
13. IP Tables
14. Service
15. ifconfig
16. netstat
17. chkconfig
18. CUPS
19. Backups

### CIS 208 Linux/UNIX III – Intermediate System Administration, Networking and Security

Continued focus on the theme of deploying/integrating Linux/Unix in the enterprise environment. Introduction to deploying essential services such as files services for Macintosh and Windows, domain name service, dynamic host configuration host protocol, mail, web and gateway services for the enterprise.

1. Samba
2. DNS
3. DHCP
4. NAT
5. Print sharing
6. ssh2 (keys)
7. mail (client: web based & thunderbird)
8. mail server
9. apache
10. tomcat
11. syslog
12. log management
13. ulimit/profiles
14. RAID

CIS 210 Linux/UNIX IV – Advanced System Administration, Networking and Security

Advanced topics in Linux/Unix Networking and Security. Advanced authentication and authorization schemes, network and host security, and advanced web topics.

1. Kerberos
2. Open LDAP
3. Port Security
4. snort
5. cgi
6. php
7. perl
8. lamp
9. squid

10. mail lists
11. PAM
12. RBAC/resource pools

### CIS 222 Linux/UNIX Programming and Scripting II

1. Advanced scripting
2. awk
3. perl intro
4. php intro
5. JAVA intro

### CIS 212 Linux/UNIX V – Advanced Topics

Special projects: single sign-on, web file access, iscsi, rpm package management, RedHat Proxy, grid computing, cluster computing, etc.

1. co-sign
2. mfile
3. building rpm packages
4. grid computing
5. cluster computing
6. Open VPN

PROGRAM CHANGE FORM

Program Code: Program Name:
CTUNLN Unix Systems

Effective Term:
Fall 2003

- Directions: 1.) Attach the current program listing from the WCC catalog and indicate any changes that you would like to make.
2.) Draw lines through anything that should be deleted and write in additions. Extensive narrative changes may be included on a separate sheet.
3.) Check the boxes below for each type of change being proposed. If you are making changes to courses or proposing new courses as part of this proposal, they must be approved separately using a Course-Syllabus Approval Form (CSAF). Courses that are being discontinued also should be submitted on CSAF forms.

1. Requested Changes:

- Remove 1 Course(s)
Add Course(s)
Total Credits: Current Credits 16 After Changes 13
Change Course Semester Sequencing
Change Title (title was Unix/Linux Systems)
Description
Advisors
Articulation Information
Program Admission Requirements
Continuing Eligibility Requirements
Footnotes
Other

Show all changes on the attached program sheet.

2. Rationale for Proposed Changes:

This certificate is the first in a series of two certificates on the Unix and Linux operating systems. This is the first of the certificates, and the title is being changed to reflect its strong emphasis on the Unix operating system.

Also, CIS 110 is being removed as a program requirement, and the certificate is being changed to an "advanced" certificate.

3. Financial/Staffing/Equipment/Space Implications:

None

4. Has the department consulted with all departments that may be impacted? Yes [checked] No [ ] NA [ ]

Comments:

\*\*REMINDER: Please include the current program sheet with all changes listed.

Signatures:

Table with 4 columns: Reviewer, Print Name, Signature, Date. Rows include Program Change Initiator (Phillip Geyer), Department Chair (Michael Galea), Division Dean/Administrator (Rosemary Wilson), and Executive Vice President, Instruction (Margaret M. Palay).

\*Please submit completed form to the Office of Curriculum and Articulation Services.

## Unix Systems (CTUNLN) Certificate

'UNDER CONSTRUCTION'

Program Effective Term: Fall 2003

---

This program prepares you for jobs installing, configuring, and managing various UNIX and Linux operating systems. You will learn about UNIX/Linux file and directory organization, basic and advanced commands, shell scripting, networking, UNIX/Linux system administration and more. These skills can be applied to the related jobs of computer operator, system administrator, data recovery planner, and computer security coordinator.

### Business and Computer Technologies Division Computer Instruction Department

**Advisors:** Michael Galea, Phil Geyer

### Program Admission Requirements:

Students must complete CIS 110 or CPS 120 with a grade of "C" or better or have equivalent knowledge.

Major/Area Requirements		(10 Credits)
CIS 121	Linux/UNIX Fundamentals	3
CIS 221	UNIX Tools and Scripts	3
CIS 286	UNIX Systems Administration	4

**Minimum Credits Required for the Program: 10**

## New Computer Degrees and Certificates

### Certificates

- **Unix/Linux Systems Certificate**

**Prepares students for:** Jobs installing, configuring, and managing various UNIX and Linux operating systems. Students will learn about UNIX/Linux file and directory organization, basic and advanced commands, shell scripting, networking, UNIX/Linux system administration, and more.

**Also gives students:** Skills that can be applied to the related jobs of computer operator, system administrator, data recovery planner, and computer security coordinator.

**Earning potential:** Detroit-area computer operators reported yearly salaries of \$27,700 for new hires and \$37,400 for those with four years of experience in a recent survey by Computerworld magazine.

**Program admissions requirements:** Students must have passing scores on the College's placement tests in reading, writing, and math.

Major/Area Requirements	Credit hours
CIS 110 Business Computer Systems	3
CIS 117 Windows® Operating System	2
CPS 171 Introduction to Programming with C++	4
CIS 121 Linux/UNIX Fundamentals	3
CIS 221 UNIX Tools and Scripts	2
CIS 286 UNIX Systems Administration	4
CIS 122 The Linux Operating System	3
<b>Total credit hours</b>	<b>21</b>

- **Windows Visual Basic Developer Certificate**

**Prepares students for:** Jobs as a developer of graphical user interface programs on a PC. Intended for students who need to acquire skills in Windows application development in Visual Basic and for students who wish to acquire skills in programming Active Server Pages.

**Also gives students:** Skills that can be applied to the related jobs of programmer/analyst, Windows programmer, PC programmer, and Web programmer.

**Earning potential:** Programmers make average yearly salaries of \$40,768 in the Detroit-Ann Arbor area and \$40,872 statewide, according to the Michigan Occupational Information System.

**Program admissions requirements:** Students must have passing scores on the College's placement tests in reading, writing, and math. Successful completion of CIS 265 Programming the Web or equivalent experience. Note: Students in this program are also presumed to have prior coursework or experience in composing web pages in HTML.

<b>Minimum Credits Required:</b>		<b>21</b>	

## Unix/Linux® Systems (CTUNLN) Certificate

This program prepares you for jobs installing, configuring, and managing various UNIX and Linux operating systems. You will learn about UNIX/Linux file and directory organization, basic and advanced commands, shell scripting, networking, UNIX/Linux system administration and more. These skills can be applied to the related jobs of computer operator, system administrator, data recovery planner, and computer security coordinator.

**Computer Instruction Department**

**Advisor:** Michael Galea, Phil Geyer

### Program Admission Requirements:

The following high school courses or equivalents must be completed with a grade of "C" or better:

- Two years of high school algebra (Algebra I and II), or MTH 169, or equivalent score on COMPASS algebra test
- A high school course in word processing and spreadsheets, or CIS 100, or permission of the program advisor

Course Number	Course Title	Credit Hours
---------------	--------------	--------------
