DEN 107 Oral Anatomy Effective Term: Winter 2020

Course Cover

Division: Health Sciences

Department: Allied Health

Discipline: Dental Assisting

Course Number: 107

Org Number: 15100

Full Course Title: Oral Anatomy

Transcript Title: Oral Anatomy

Is Consultation with other department(s) required: No

Publish in the Following: College Catalog , Time Schedule , Web Page

Reason for Submission: Three Year Review / Assessment Report

Change Information:

Other:

Rationale: Three year update. As outlined in the course assessment, the students are meeting the learning outcomes and there were no intended changes.

Proposed Start Semester: Fall 2019

Course Description: This is an introductory course in head and neck anatomy. Students cover intraoral and extraoral structures of the skull and face, including bones, muscles, and soft tissue. Tooth surface annotation, cavity classification, occlusion and malocclusion are emphasized.

Course Credit Hours

Variable hours: No

Credits: 2

Lecture Hours: Instructor: 30 Student: 30

Lab: Instructor: 0 Student: 0

Clinical: Instructor: 0 Student: 0

Total Contact Hours: Instructor: 30 Student: 30

Repeatable for Credit: NO

Grading Methods: Letter Grades

Audit

Are lectures, labs, or clinicals offered as separate sections?: NO (same sections)

Proposed For:

Student Learning Outcomes

1. Identify intraoral and extraoral structures of the head and neck including bones, muscles, and tissue.

Assessment 1

Assessment Tool: Departmental exam

Assessment Date: Winter 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Answer key, followed by item analysis

Standard of success to be used for this assessment: 80% of students will answer each item correctly and 80% of the students to receive 80% overall

Who will score and analyze the data: DA faculty

Assessment 2

Assessment Tool: Practical exam

Assessment Date: Winter 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Departmentally-developed checklist identifying anatomical structures

Standard of success to be used for this assessment: 90% students will pass on first attempt

Who will score and analyze the data: DA faculty

2. Identify systems for annotating tooth surfaces, and classifying cavities and occlusion/malocclusion.

Assessment 1

Assessment Tool: Departmental exam

Assessment Date: Winter 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Answer key, followed by item analysis

Standard of success to be used for this assessment: 80% of students will answer each item correctly and 80% of the students to receive 80% overall

Who will score and analyze the data: DA faculty

Assessment 2

Assessment Tool: Practical exam

Assessment Date: Winter 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All

Number students to be assessed: All

How the assessment will be scored: Departmentally-developed checklist identifying anatomical structures

Standard of success to be used for this assessment: 90% of students will pass on first attempt (achieve score of 85% or higher).

Who will score and analyze the data: DA faculty

Course Objectives

1. Recognize common dental prefixes and suffixes.
2. Identify body planes and anatomical terms of reference.
3. Identify craniofacial bones and landmarks.
4. Identify origin, insertion and function of each of the muscles of mastication and associated muscles.

5. Identify the components of the TMJ and its function.
6. Identify the paranasal sinuses and their function.
7. Identify the salivary glands and their function.
8. Identify orofacial tissues, structures, and extraoral and intraoral landmarks.
9. Utilize terminology to identify landmarks and features of the permanent dentition.
10. Identify the location of each primary/permanent tooth according to their dentition, arch, and quadrant.
11. Identify each primary/permanent tooth using the correct terms and various numbering systems.
12. Identify the terms related to occlusion and malocclusion.
13. Identify how malocclusion is classified.
14. Identify the various cavity classifications.
